Fire Victims Group Responds to First Wildfire Conference Committee

SACRAMENTO — “Up from the Ashes” co-chair Patrick McCallum released the following response to today’s first hearing of the Legislature’s Conference Committee on SB 901, a bill authored by Senator Bill Dodd (D-Napa) to reduce the risk of wildfires caused by utility power equipment:

“Today’s hearing was a good first step in what promises to be a long and important journey — the goal of which must be fair and carefully crafted solutions that protect the right of victims to recover their losses from utility-caused fires, and effective new safety, maintenance and fire prevention policies enforced by stringent accountability measures.”
